

new features in InterfaceBuilder

Instructors: John Clem, Brad Johnson

TA's: Cole Bratcher, Dan Fairbanks, Reed Sweeney

size classes

configurations

- 4 things you can change between configurations:
 - fonts
 - constraint constants
 - turns views on/off
 - turn constraints on/off

size classes *in* code

- UITraitEnvironment *protocol*
- traitCollectionDidChange
- willTransitionToSize()

IBDesignable

- Create custom interface builder components
- Designable views must be in a separate framework
- Prefix your class declaration with @IBDesignable

IBInspectable

- Exposes attributes in `InterfaceBuilder`
- Prefix your variable declaration with `@IBInspectable`
- Add `didSet` method to the variable
- Set `self.property`, then update the view based on the changes
